EDUCATION

University of Virginia, Charlottesville, VA

Expected May 2027

B.S. Computer Science and B.A. Applied Statistics

- 3.80 GPA
- Relevant Coursework: Data Structures & Algorithms, Computer Systems & Organizations 1/2, Software Development Essentials, Probability, Regression Analysis

SKILLS

Languages: Java, C, Python, JavaScript/TypeScript, R, SQL, HTML, CSS, MATLAB

Frameworks: React, Next.js, Node.js, Tailwind, Git, Selenium, BeautifulSoup, NumPy, PyTorch, Pandas, openpyxl

Certifications: 2025 Oracle Cloud Infrastructure (OCI) Foundations, 2025 Oracle AI Foundations Associate, CITI Basic Researcher

EXPERIENCE

Machine Learning Researcher, School of Data Science, Charlottesville, VA

April 2025 - Present

- Built an automated data pipeline using BeautifulSoup and Selenium, extracting **1000+** records in **8** minutes, down from 3 hours, resulting in **95.6%** increased efficiency
- Detected **30+** inconsistent time series data sets utilizing anomaly detection techniques leveraging **Python** libraries openpyxl, **NumPy**, and **Pandas**
- Research synthetic data generation techniques for enhancing time-series prediction in language models

Software Engineer Intern, Mythics, LLC, Virginia Beach, VA

May 2025 - August 2025

- Led a sales team of **5–10** through procurement of an internal client prospecting tool surfacing **20+** high-quality business leads per run
- Drove over **\$1M** in net new pipeline opportunities per use by creating an interactive **React.js** sales opportunity dashboard
- Automated data ingestion and enrichment with **Express.js** backend API endpoints, constructed pipeline from Oracle Cloud **ADW** data warehouse cutting manual data entry by **100%**

Robotics Researcher, Collaborative Robots Lab, Charlottesville, VA

January 2025 - June 2025

- Developed **Llama-3** powered AI speech-to-text and text-to-speech, enabling human-robot communication, improving interaction latency by **25%**
- Implemented an intuitive GUI enhancing robot responses and blocking hallucinations, while maintaining **sub-300ms** response times
- Modularized **ROS2** nodes for LLM-based communication, cutting integration time by **~40%** and streamlining debugging

PROJECTS

PromptLite - HooHacks 2025, Sustainable Prompting Chrome Extension, [Devpost](#)

March 2025

- Built a Chrome Extension using **React.js**, **TailwindCSS**, and Vite, reducing user ChatGPT token waste by **30%** through optimized prompt templates
- Conducted real-time testing with over **25** users to improve UX and rapidly reduce average prompt iterations by **1.8x**
- Collaborated with a 3-person team to ship a scalable MVP in under 24 hours

Personal Project, AI Macronutrient Tracker, [Initial Design](#)

September 2024

- Leveraged React.js, TypeScript, and Google Vision API to develop a web application calculates accurate macronutrient and calorie data from photo recipes
- Designed and built initial MVP to assure capability and user-friendly functionality for web and mobile deployment

LEADERSHIP EXPERIENCE

Event Coordinator Chair, Shanti Bhavan Club

August 2025 - Present

- Organized student events that increase engagement and support for Shanti Bhavan's educational mission

Personal Trainer, UVA Recreation, Charlottesville, VA

January 2025 - Present

- Guided **20+** clients through 100+ personalized sessions, breaking down complex goals into actionable steps for long-term client growth
