Education

The University of Virginia, *College of Engineering and Applied Sciences*

Expected May 2027

Bachelor of Science Computer Science, Bachelor of Arts Applied Statistics

GPA: 3.80 / 4.00

• **Relevant Coursework:** Data Structures and Algorithms, Machine Learning, Artificial Intelligence, Regression Analysis

Technical Skills

Languages: Java, C, Python, JavaScript/TypeScript, R, SQL, HTML, CSS, MATLAB

Frameworks: React.js, Next.js, Node.js, TailwindCSS, NumPy, PyTorch, Pandas, REST APIs, OOP, Mockito, Git, Agile

Certifications: 2025 Oracle Cloud Infrastructure (OCI) Foundations, 2025 Oracle AI Foundations Associate, CITI Researcher

Experience

Amazon Web Services (AWS)

May 2026 – August 2026

Software Development Engineer Intern

Herndon, VA

- Designed and built a value insights system surfacing **\$15M** in actionable price intelligence daily, replacing manual spreadsheets with an on-demand dashboard and cutting manual record pricing by **99%** for internal metering teams
- Architected a distributed pricing application in Java hosted on **AWS Fargate**, leveraging an event-driven pipeline to process **7,000** billing records per minute with **99.94%** file success rate
- Engineered data ingestion to handle **5M** writes per hour to InfluxDB, optimizing batch writes and time-series indexing to serve sub-second time-range queries to **React.js** (TypeScript) dashboards

Mythics, LLC

May 2025 – August 2025

Software Engineer Intern

Virginia Beach, VA

- Led a cross-functional team of 5–10 through development of a **full-stack** client prospecting tool surfacing **20+** high-quality business leads and **\$1M** in generated business pipelines per use
- Built interactive data visualization components in **React.js** with modular state management, rendering client metrics across filterable lead scoring views, reducing lead evaluation time by **40%** across **3** internal teams
- Architected data ingestion and enrichment with **REST API** endpoints leveraging **Express.js** and Oracle ADW to fetch **50,000+** records in sub **600ms** latency

UVA School of Data Science

April 2025 – Present

Machine Learning Researcher

Charlottesville, VA

- Trained a CLIP-based multimodal retrieval model using **PyTorch**, aligning time-series chart embeddings with natural language descriptions across **3,000+** Federal Reserve economic blog posts
- Built scalable preprocessing pipelines in **Pandas** and **NumPy**, transforming raw economic time-series records into structured contrastive learning pairs, reducing data preparation time by **95%**
- Optimized model training through systematic data quality filtering and time-series alignment, removing **30+** insufficient data pairs and improving validation recall convergence by **45%** across encoder configuration experiments

Projects / Leadership

PromptLite | *React.js, TailwindCSS, Vite, Chrome API*

March 2025

- Built a Chrome Extension using React.js, TailwindCSS, and Vite, reducing user ChatGPT token waste by 30% while visualizing users' sustainable AI usage patterns
- Implemented lightweight data persistence using the **Chrome Storage API**, locally caching token counts and prompt metadata for real-time efficiency tracking
- Rendered dynamic data visualization modules with **Recharts**, transforming token-level logs into clear trend insights on user efficiency and sustainability

Recipe Macro Tracker | *Expo, React.js, Flask, Google Vision OCR, Amazon AWS*

November 2024

- Engineered a full-stack macronutrient tracking application using React.js, Flask, and Expo, supporting cross-platform deployment for web and mobile clients
- Deployed and managed the application on **AWS EC2** with S3 storage, integrating **RESTful Flask APIs** for real-time nutrient computation and user authentication
- Scaled backend services to reliably handle **100+ active users**, improving request latency and data synchronization across devices

UVA Personal Trainer

January 2025 – August 2026

- Guided over 20 clients through 100+ personalized sessions, breaking down complex goals into actionable steps for long-term client growth
- Constructed measurable performance metrics, increasing program adherence and goal completion by 25%
